

References and Exercises:

- Fast Selection [GT 9.2] [CLRS 9.3]

Exercise: Implement $\text{SPLIT}(S, x)$ in-place, i.e., by only swapping elements inside the array S .

- Black-box Minimization: https://en.wikipedia.org/wiki/Golden-section_search

Exercise: Implement it / write out the pseudocode

- Convex Hulls: with different algorithms [GT 22.2] [CLRS 33.3]

Exercise: Fill in the details of the other cases.

- Closest-Pair of Points: with different algorithms [22.4]

Exercise: Work through the analysis slide.
